

Clinical Pharmacy

A clinical pharmacist is a highly trained health professional specializing in medications and their effects on health. As integral members of your healthcare team, clinical pharmacists work closely with you and your healthcare providers to ensure that your medications are helping you get better and stay well.

APPOINTMENTS

Discover the benefits of clinical pharmacy services by talking to your healthcare provider. They can submit a referral and assist with scheduling an appointment.

SERVICES

- Discussion about medications you are taking to ensure they are working for you
- Education about long-term conditions
- Help to make positive changes to your life to help you stay well
- Review medications to make sure they are working together
- Review medication costs and side effects
- Follow-up monitoring
